

# South Fox Island Lighthouse

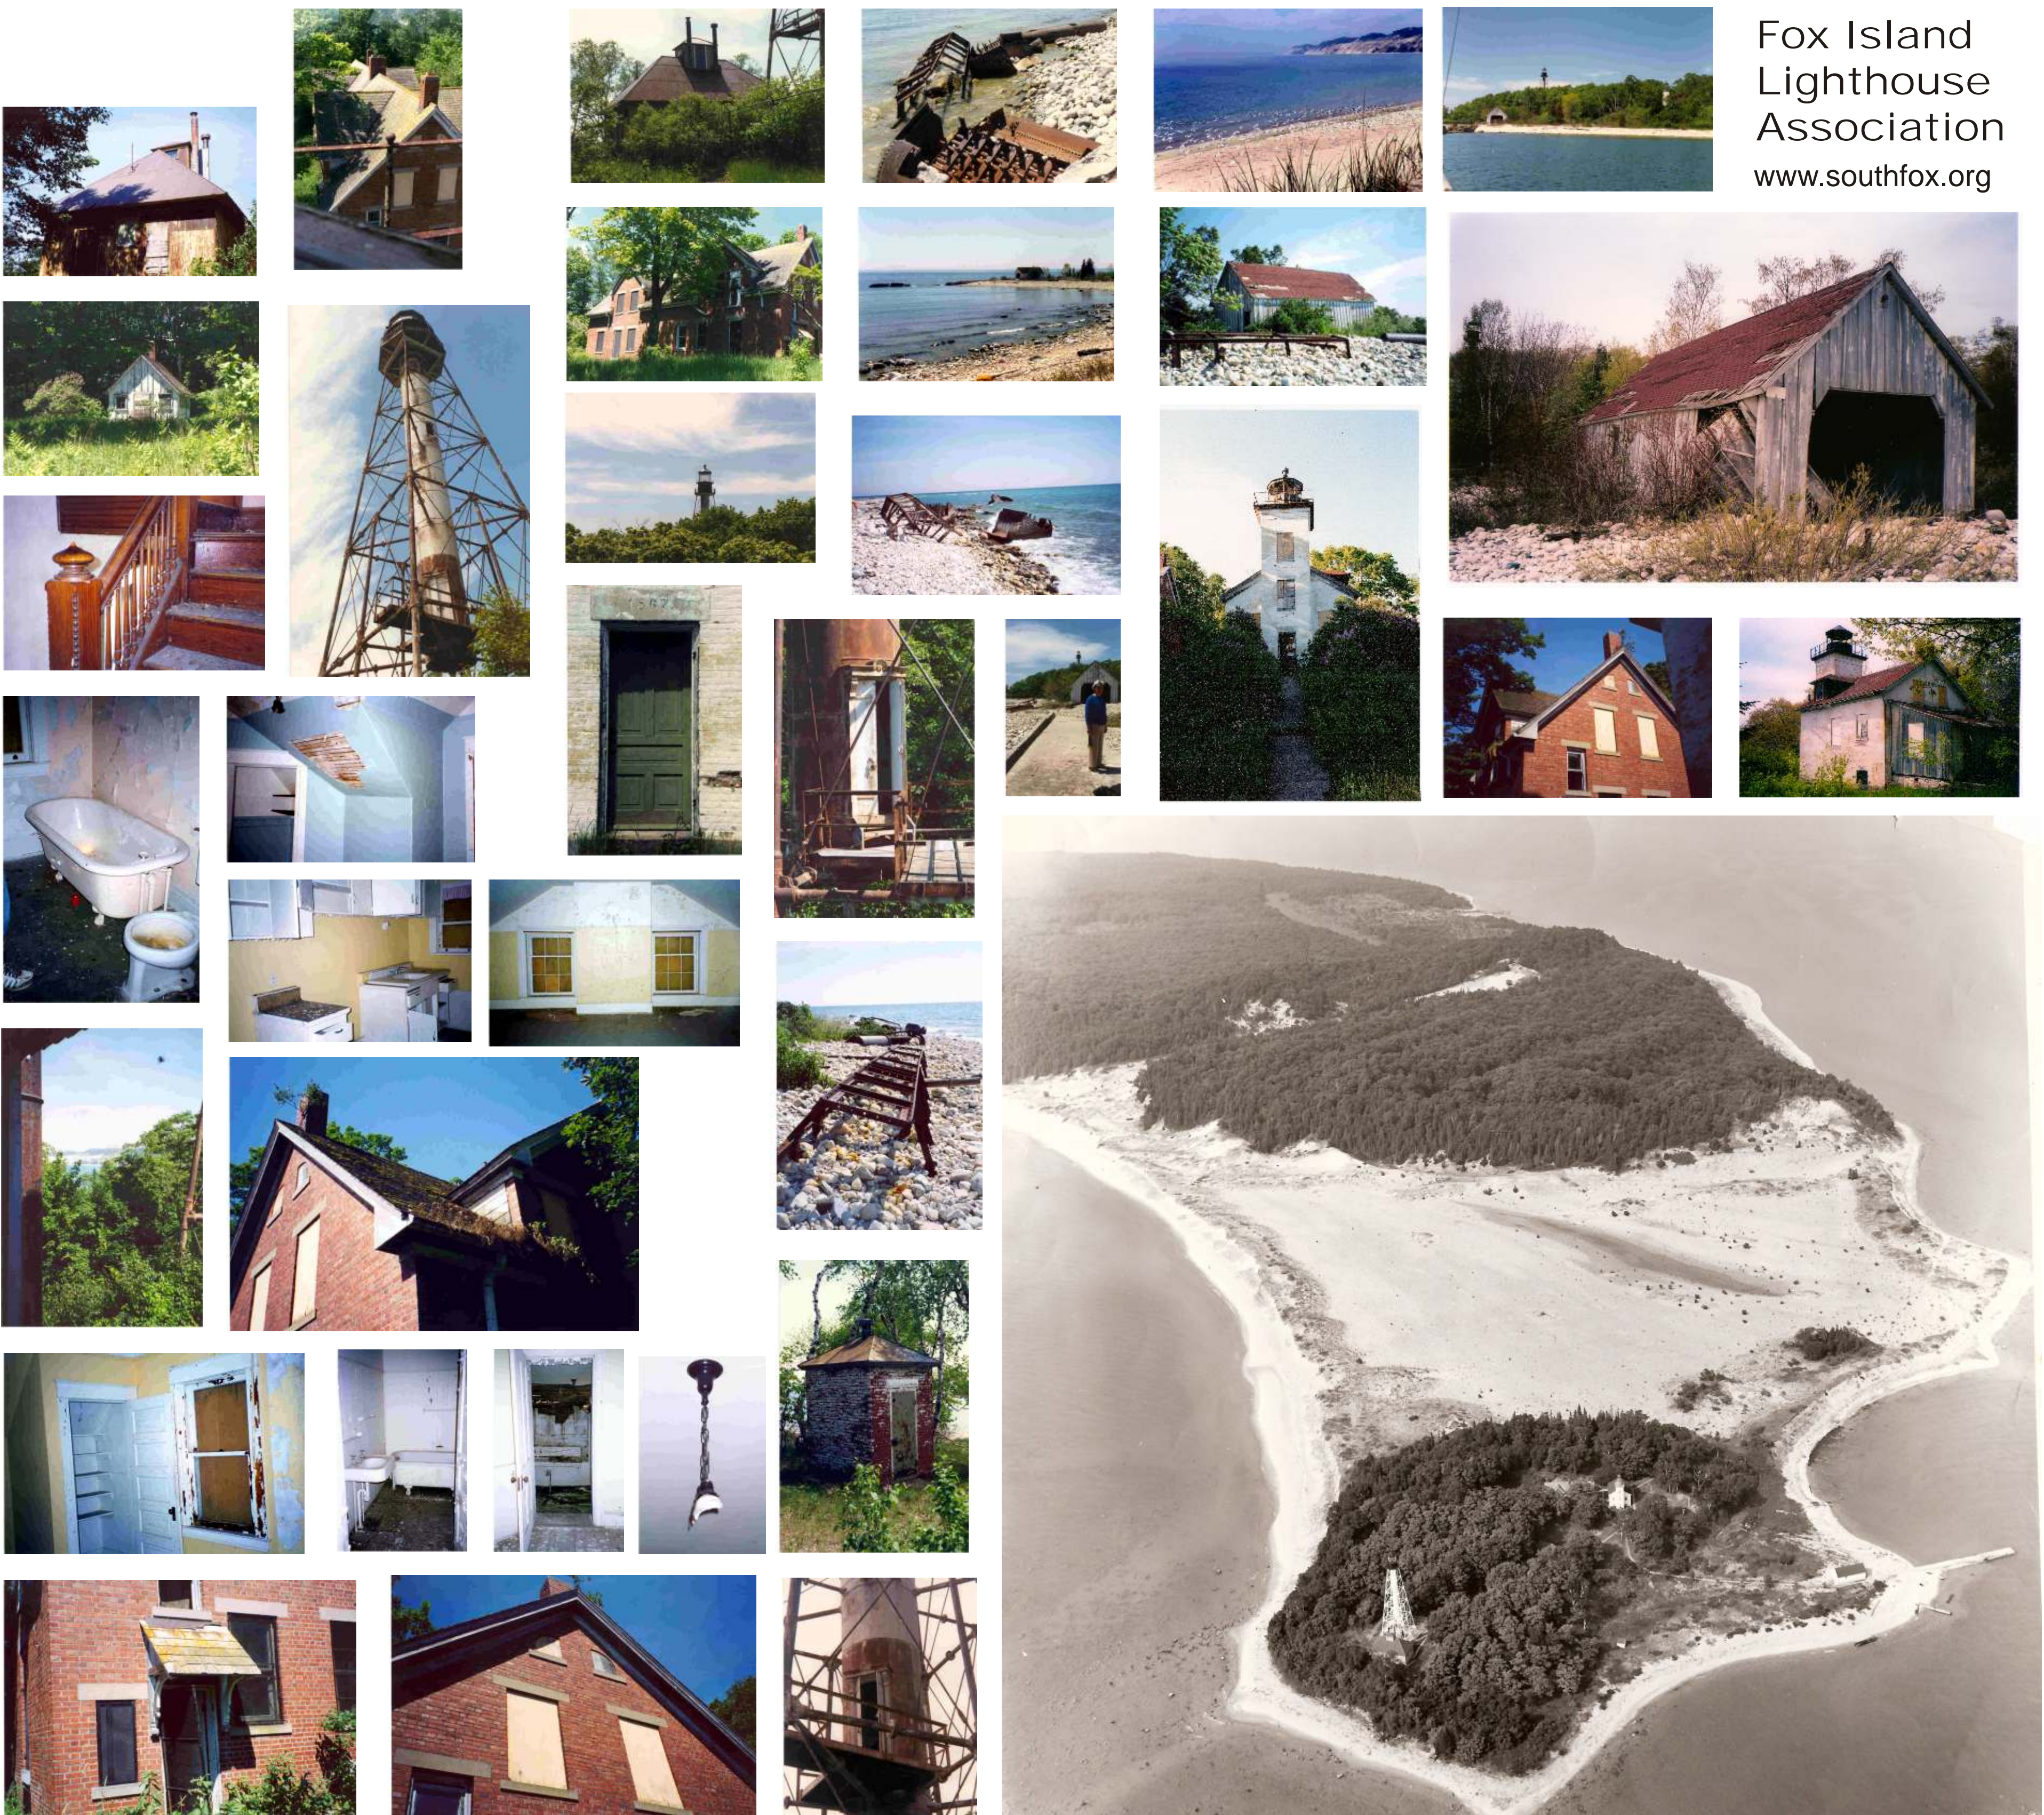

MICHIGAN

## Help us **Save the Lighthouse!**

For almost 100 years the lighthouse of South Fox Island protected Lake Michigan mariners from the dangerous and extensive Fox Island shoals. Since the decommission of the light complex this historic site has steadily deteriorated. The Fox Island Light Association (FILA) is committed to halting this deterioration and preserving this lighthouse complex for further generations. This 115 acre site is the property of the people of Michigan. FILA is working closely with the DNR and local historic preservation specialists and to evaluate the condition of the historic structures and to assure their protection with the goal of restoration. **We need YOUR help!** Please join us in the preservation of this important part of our history!
